

# IMAGINATIVE FLOORS

The sheer choice of carpets these days allows the imagination to run riot. The combination of fibre and construction bring carpet within the reach of every pocket for any room in the home. But, in addition to this, carpets can also be made in any colour to match absolutely any interior design scheme that takes your fancy.

When it comes to rugs, the choice is endless. Rugs and squares are a natural partner of wood and smooth floors. They are insulators, sound absorbent and the wear can be evened out by turning the rug around. Machine made rugs are now available in many traditional and modern designs while hand-tufted thick pile rugs can be embellished with carving or even made to your own designs. Oriental hand-knotted rugs have also taken on more modern colours aimed at the western market.

Connecting Colours. Twelve bright, jazzy colours in 70% polypropylene and 30% polyester by Kingsmead. £10.99 sq m

Petit Point 100% pure new wool rugs. Traditional Brussels wilton in Wools of New Zealand quality and two sizes from The Tintawn Weaving Company. From £200.

Locating that special shade is easy with Ryalux. This company will dye yarn to any colour and make carpet in any of the most popular textures, several weights and qualities. The carpet can also be made in any width up to five metres eliminating wastage and saving money. From £34.95 sq m.
