

As used in the White House, the Kremlin and 3 Moor Lane.

You may not have to roll your carpet out before use. And it may be the cat that walks over it, not a visiting foreign dignitary. But that is hardly an excuse for letting dust or allergens linger.

As the world's largest manufacturer of commercial upright vacuum cleaners, our products have been keeping the corridors of power spotless for years. And although we make less of a fuss than other manufacturers, we like to think we make more of a vacuum cleaner.

All SEBO machines are made in Germany to the highest standards, allowing you to enjoy their superior performance and unrivalled practicality for year after year. You won't even need to replace the belt.

In fact, it has been said that SEBO vacuum cleaners last up to twice as long as other machines at a comparable price. And up to three times as long as some Presidents.

SEBO also manufacture a range of innovative cylinder vacuum cleaners, and a variety of floorcare products.

The Intelligent Choice
